

Industrial production – Growth continued in June, albeit with volatility among sectors

- Industrial production (June): -0.7% y/y nsa; Banorte: -0.8%; consensus: -0.1% (range: -0.8% to 1.4%); previous: 1.1%
- Industrial activity climbed 0.4% m/m, adding two months of improvements and corroborating a relatively positive bias at the end of 2Q24
- Gains centered in manufacturing at 2.0% –with 14 out of 21 categories higher. Construction fell 2.3%, not entirely surprising given relevant gains in the three previous months. Mining was also negative at -2.0%, noting volatility in ‘related services’
- Despite a marginally lower performance than suggested by the preliminary GDP, it would not be enough to impact total activity in the quarter, which came in at 0.2% q/q
- Risks remain ahead, although some actions and events stand out that could provide some support to activity

Industry falls in annual terms, facing a challenging base effect. Production fell 0.7% y/y (see [Chart 1](#)), lower than consensus (-0.1%) but practically matching our estimate (-0.8%). Two sectors remained positive, being construction at 1.5% –now with edification leading, but with civil engineering negative–, and utilities at 3.6%. Manufacturing fell 0.9% ([Chart 2](#)), with a heterogeneous behavior inside. Finally, mining came in at -4.3%, with adverse results persisting in the oil sector, although by a more modest magnitude. With seasonally adjusted figures, industry expanded 0.4% y/y, with the month impacted by a lower number of working days vs. June 2023. For further details, please see [Table 1](#).

Sequential uptick, marking a two-month uptrend. Activity grew 0.4% m/m, adding to the 0.7% of the previous month, although with an heterogeneous performance within ([Chart 3](#)). The result is consistent with a recovery throughout the quarter despite acknowledging that it weaker than what we originally estimated. At the margin, there were a couple of negative surprises in some sectors.

Manufacturing led at 2.0%. This happened after a relatively disappointing performance in the previous months and seems supported by a higher dynamism of the category in the US recently. Thus, 14 out of 21 subsectors grew. We note the 6.0% in transportation, consistent with early figures for heavy vehicles. Others with notable expansions include oil and carbon at 9.8% –facing a rather favorable base effect–, machinery and equipment at 2.3%, and electronic goods at 1.5%. On the contrary, losses were concentrated in base metals (-6.3%), textiles ex. clothing (-1.4%) and chemicals (-0.8%). On the latter, we highlight that the strike at steelmaker *ArcelorMittal* continued in the month. For more details see [Table 2](#).

Mining fell by 2.0%, erasing last month’s expansion. The oil component rebounded marginally by 0.5%, with positive figures for both gas and crude oil extraction. With this, the component broke nine months to the downside. Non-oil backtracked 4.7%, facing a rather challenging base effect as it expanded 9.2% in May. Related services fell 10.2%, with volatility persisting in this category.

Construction declined 2.3%. Losses were widespread, with edification down by 2.6% as it faced the most difficult base effect. Civil engineering dropped for a third consecutive month, now at -0.9%. Lastly, ‘specialized works’ contracted 1.5%.

Document for distribution among the general public

Headwinds remain, although with some positive signs that could provide support. With today's results, industrial production would have grown 0.2% q/q in 2Q24, 6bps lower vs. the figure in the [2Q24 preliminary GDP report](#). Despite of the moderation, it would not be enough to skew total activity in the period, which grew 0.2% q/q.

We continue to believe that headwinds remain, consistent with [the usual economic after federal elections](#). At first, we thought that the most affected sector would be construction. But as we have said in previous publications, the fact that works on some of the federal government's priority projects continued in July and August should be positive. Added to this are private sector initiatives focused on continuing the momentum seen in the public sector. In this regard, the *Mexican Chamber of the Construction Industry* (CMIC in Spanish) published in recent days a decalogue of proposals, seeking not only to boost spending in this area, but also to make it more profitable and efficient. In addition, we will be looking to the specific initiatives of the housing plan from the incoming administration, although we are aware that this could not materialize until 2025 or later.

In manufacturing, the strike at the *ArcelorMittal* steel company lasted 55 days, with a court ending it at the beginning of August. Given this, related industries are likely to remain somewhat dampened in the short-term. In addition, signals from the US are adverse, with the PMI and ISM manufacturing remaining in contraction in July. However, we believe that resilience in key sectors such as autos will be very important to support the component. Specifically, the *National Auto Parts Industry* (INA in Spanish) indicated that its production reached a record high in May and that they expect the year to close with a 4% y/y expansion.

Finally, mining companies have shown gains due to the recovery in the prices of some metals. This could be related to improvements in the non-oil component in recent months. However, we stay cautious given that, with the prospect of a slowdown, businesses could choose to reduce their mining operations, so it will be very important to follow their communications in coming months.

Analyst Certification.

We, Alejandro Padilla Santana, Juan Carlos Alderete Macal, Alejandro Cervantes Llamas, Marissa Garza Ostos, Katia Celina Goya Ostos, Francisco José Flores Serrano, José Luis García Casales, Santiago Leal Singer, Víctor Hugo Cortes Castro, Leslie Thalía Orozco Vélez, Hugo Armando Gómez Solís, Carlos Hernández García, Yazmín Selene Pérez Enríquez, Cintia Gisela Nava Roa, Miguel Alejandro Calvo Domínguez, José De Jesús Ramírez Martínez, Daniel Sebastián Sosa Aguilar, Gerardo Daniel Valle Trujillo, Luis Leopoldo López Salinas, Marcos Saúl García Hernández, Juan Carlos Mercado Garduño, Ana Gabriela Martínez Mosqueda, Jazmín Daniela Cuautencos Mora, Andrea Muñoz Sánchez and Paula Lozoya Valadez, certify that the points of view expressed in this document are a faithful reflection of our personal opinion on the company (s) or firm (s) within this report, along with its affiliates and/or securities issued. Moreover, we also state that we have not received, nor receive, or will receive compensation other than that of Grupo Financiero Banorte S.A.B. of C.V. for the provision of our services.

Relevant statements.

In accordance with current laws and internal procedures manuals, analysts are allowed to hold long or short positions in shares or securities issued by companies that are listed on the Mexican Stock Exchange and may be the subject of this report; nonetheless, equity analysts have to adhere to certain rules that regulate their participation in the market in order to prevent, among other things, the use of private information for their benefit and to avoid conflicts of interest. Analysts shall refrain from investing and holding transactions with securities or derivative instruments directly or through an intermediary person, with Securities subject to research reports, from 30 calendar days prior to the issuance date of the report in question, and up to 10 calendar days after its distribution date.

Compensation of Analysts.

Analysts' compensation is based on activities and services that are aimed at benefiting the investment clients of Casa de Bolsa Banorte and its subsidiaries. Such compensation is determined based on the general profitability of the Brokerage House and the Financial Group and on the individual performance of each analyst. However, investors should note that analysts do not receive direct payment or compensation for any specific transaction in investment banking or in other business areas.

Last-twelve-month activities of the business areas.

Grupo Financiero Banorte S.A.B. de C.V., through its business areas, provides services that include, among others, those corresponding to investment banking and corporate banking, to a large number of companies in Mexico and abroad. It may have provided, is providing or, in the future, will provide a service such as those mentioned to the companies or firms that are the subject of this report. Casa de Bolsa Banorte or its affiliates receive compensation from such corporations in consideration of the aforementioned services.

Over the course of the last twelve months, Grupo Financiero Banorte S.A.B. C.V., has not obtained compensation for services rendered by the investment bank or by any of its other business areas of the following companies or their subsidiaries, some of which could be analyzed within this report.

Activities of the business areas during the next three months.

Casa de Bolsa Banorte, Grupo Financiero Banorte or its subsidiaries expect to receive or intend to obtain revenue from the services provided by investment banking or any other of its business areas, by issuers or their subsidiaries, some of which could be analyzed in this report.

Securities holdings and other disclosures.

As of the end of last quarter, Grupo Financiero Banorte S.A.B. of C.V. has not held investments, directly or indirectly, in securities or derivative financial instruments, whose underlying securities are the subject of recommendations, representing 1% or more of its investment portfolio of outstanding securities or 1 % of the issuance or underlying of the securities issued.

None of the members of the Board of Grupo Financiero Banorte and Casa de Bolsa Banorte, along general managers and executives of an immediately below level, have any charges in the issuers that may be analyzed in this document.

The Analysts of Grupo Financiero Banorte S.A.B. of C.V. do not maintain direct investments or through an intermediary person, in the securities or derivative instruments object of this analysis report.

Guide for investment recommendations.

	Reference
BUY	When the share expected performance is greater than the MEXBOL estimated performance.
HOLD	When the share expected performance is similar to the MEXBOL estimated performance.
SELL	When the share expected performance is lower than the MEXBOL estimated performance.

Even though this document offers a general criterion of investment, we urge readers to seek advice from their own Consultants or Financial Advisors, in order to consider whether any of the values mentioned in this report are in line with their investment goals, risk and financial position.

Determination of Target Prices

For the calculation of estimated target prices for securities, analysts use a combination of methodologies generally accepted among financial analysts, including, but not limited to, multiples analysis, discounted cash flows, sum-of-the-parts or any other method that could be applicable in each specific case according to the current regulation. No guarantee can be given that the target prices calculated for the securities will be achieved by the analysts of Grupo Financiero Banorte S.A.B. C.V, since this depends on a large number of various endogenous and exogenous factors that affect the performance of the issuing company, the environment in which it performs, along with the influence of trends of the stock market, in which it is listed. Moreover, the investor must consider that the price of the securities or instruments can fluctuate against their interest and cause the partial and even total loss of the invested capital.

The information contained hereby has been obtained from sources that we consider to be reliable, but we make no representation as to its accuracy or completeness. The information, estimations and recommendations included in this document are valid as of the issue date, but are subject to modifications and changes without prior notice; Grupo Financiero Banorte S.A.B. of C.V. does not commit to communicate the changes and also to keep the content of this document updated. Grupo Financiero Banorte S.A.B. of C.V. takes no responsibility for any loss arising from the use of this report or its content. This document may not be photocopied, quoted, disclosed, used, or reproduced in whole or in part without prior written authorization from Grupo Financiero Banorte S.A.B. of C.V.
