

## Seasonal drivers impact labor market indicators in August

- **Unemployment rate (August; nsa): 3.04%; Banorte: 2.88%; consensus: 2.91% (range: 2.80% to 3.00%); previous: 2.93%**
- **Part-time workers rate: 8.0% (previous: 8.1%); participation rate: 60.2% (previous: 61.0%)**
- **In August, 626.8 thousand jobs were lost, highlighting a mixed seasonal pattern in the month. The number of unemployed increased by 50.9 thousand, with the labor force contracting by 575.9 thousand. These factors explain the upward adjustment in the unemployment rate**
- **With seasonally adjusted figures, the unemployment rate increased by 8bps to 2.76%, adding 22 consecutive months below the 3% threshold**
- **The formal sector shed 158.4 thousand jobs, with the informal one eliminating 468.4 thousand. Thus, the informality rate came in at 54.3% (previous: 54.5%). By sectors, losses concentrated in services (-620.0 thousand)**
- **The average hourly wage stood at \$61.13 (previous: \$61.85), with the annual metric moderating to 12.6% (previous: +14.1%). We believe elevated rates will continue in the remainder of 2024 and throughout 2025**
- **Considering challenges for activity in coming months, we continue to anticipate modest upward adjustments in the unemployment rate. Despite of the latter, labor market tightness will continue, contributing to further wage growth and extending the resilience of consumption**

**Loss of 626.8 thousand jobs in August, with a mixed seasonal pattern in the context of summer vacations.** With original figures, the unemployment rate stood at 3.04% (chart below, left), above consensus (2.91%) and our estimate (2.88%). As expected, labor market figures are distorted by the end of the holiday period, with the return to classes at different levels progressively throughout the month. In this sense, the main move comes as a response of two opposing adjustments –part of the population resuming their studies and leaving the ‘available for work’ and ‘employed’ groups, and those people regaining the possibility of looking for a job by having more available time after the summer. Other metrics such as the part-time rate and wages continue showing signs of strength in the labor market. Using seasonally adjusted figures, the unemployment rate increased by 8bps to 2.76%, keeping a considerable distance from the 3% threshold, corroborating the favorable situation on this front.

Back to original figures, the labor force contracted by 575.9 thousand people, with -626.8 thousand employed and +50.9 thousand unemployed. Thus, the participation rate came in at 60.2% (see graph below, right), still above its long-term average. With these results, job creation in the last 12 months accumulates 518.8 thousand. Meanwhile, people outside of the labor force increased 1.1 million, with those ‘available for work’ rising by 148.2 thousand and those ‘not available’ expanding by 906.6 thousand, consistent with what was mentioned in the paragraph above. As in previous occasions, we add the ‘available for work’ not in the labor force group to both the unemployed and the labor force to better reflect market conditions. With this, the ‘expanded’ unemployment rate stood at 10.97%, 36bps above July’s level (10.60%).

## Unemployment rate

Source: Banorte with data from INEGI

## Participation rate

Source: Banorte with data from INEGI

**Losses in the informal sector and services.** Formal employment declined by 158.4 thousand, with those in informality down by 468.4 thousand. Hence, the informality rate fell to 54.3% (previous: 54.5%). By sectors, services shed 620.0 thousand jobs, with agriculture losing 226.8 thousand. Starting with the tertiary sector, the contraction was widespread, noting 'diverse' (-420.3 thousand), government (-211.7 thousand), and commerce (-140.3 thousand). On the contrary, industry added 196.4 thousand, with manufacturing up (+388.5 thousand), but with construction down (-185.1 thousand). The part-time rate ticked down to 8.0%. Finally, average hourly wages came in at \$61.13, down \$0.72 vs. July. The annual rate moderated to 12.6% (previous: +14.1%), although remaining high. This supports our belief of little labor market slack, the impact from the 'lighthouse effect' due to minimum wage hikes, and other revisions.

## INEGI's employment report

Non-seasonally adjusted figures, %

	Aug-24	Jul-24	Difference
Unemployment rate	3.04	2.93	0.11
Participation rate	60.2	61.0	-0.8
Part-time workers rate	8.0	8.1	-0.1
Formal employment	45.7	45.5	0.2
Informal employment <sup>1</sup>	54.3	54.5	-0.2
Working in the informal economy	28.3	27.9	0.4
Working in the formal economy	26.0	26.6	-0.6

<sup>1</sup> Informal employment considers workers not affiliated to the Social Security Institutes (IMSS and ISSSTE) and the armed forces. However, those in the formal economy do pay some form of income tax.

Note: Differences might not match due to the number of decimals allowed in the table. Source: INEGI

**The labor market will remain tight despite our view of slight upward adjustments in the unemployment rate.** Despite a challenging outlook for activity in 2H24 –anticipating more limited economic growth–, we believe that sector indicators will continue to show at best strength, but at worst resiliency. In this context, and consistent with the moderation of activity, we expect a slight uptick in the unemployment rate in coming months, with the metric closing 2024 between 2.9% and 3.0% (using seasonally adjusted figures).

On wages, our view is that they will keep rising, in large part due to tight conditions. In this regard, Banxico's Deputy Governor, Jonathan Heath, spoke in our [Norte Económico](#) podcast (available only in Spanish) about this variable, noting that "...we are still seeing relatively strong wage revisions. The latest figures from IMSS show revisions above 9%...". In line with this, contractual agreements by PEMEX and its union for the 2024-2025 period at the end of July (+5% salaries and +2% benefits) reaffirm this trend. In addition, we believe that the push of the 'lighthouse effect' of the minimum wage revisions will continue, with the new administration's goals also implying substantial adjustments.

In contrast, and focusing on the supply side, *PageGroup's 2024-2025 Salary Guide* reflects that there is greater uncertainty about workers' job security. Specifically, the report highlights that *"...today we note that only 49% of the talent surveyed is confident that they will not lose their job, compared to 58% who expressed this level of confidence last year."* According to the group's director, Oliver Odreman, some of the reasons that could explain such a change include the election year and the economic climate.

## Analyst Certification.

We, Alejandro Padilla Santana, Juan Carlos Alderete Macal, Alejandro Cervantes Llamas, Marissa Garza Ostos, Katia Celina Goya Ostos, Francisco José Flores Serrano, José Luis García Casales, Santiago Leal Singer, Víctor Hugo Cortes Castro, Leslie Thalía Orozco Vélez, Hugo Armando Gómez Solís, Carlos Hernández García, Yazmín Selene Pérez Enríquez, Cintia Gisela Nava Roa, Miguel Alejandro Calvo Domínguez, José De Jesús Ramírez Martínez, Daniel Sebastián Sosa Aguilar, Gerardo Daniel Valle Trujillo, Luis Leopoldo López Salinas, Marcos Saúl García Hernández, Juan Carlos Mercado Garduño, Ana Gabriela Martínez Mosqueda, Jazmín Daniela Cuautencos Mora, Andrea Muñoz Sánchez and Paula Lozoya Valadez, certify that the points of view expressed in this document are a faithful reflection of our personal opinion on the company (s) or firm (s) within this report, along with its affiliates and/or securities issued. Moreover, we also state that we have not received, nor receive, or will receive compensation other than that of Grupo Financiero Banorte S.A.B. of C.V. for the provision of our services.

## Relevant statements.

In accordance with current laws and internal procedures manuals, analysts are allowed to hold long or short positions in shares or securities issued by companies that are listed on the Mexican Stock Exchange and may be the subject of this report; nonetheless, equity analysts have to adhere to certain rules that regulate their participation in the market in order to prevent, among other things, the use of private information for their benefit and to avoid conflicts of interest. Analysts shall refrain from investing and holding transactions with securities or derivative instruments directly or through an intermediary person, with Securities subject to research reports, from 30 calendar days prior to the issuance date of the report in question, and up to 10 calendar days after its distribution date.

## Compensation of Analysts.

Analysts' compensation is based on activities and services that are aimed at benefiting the investment clients of Casa de Bolsa Banorte and its subsidiaries. Such compensation is determined based on the general profitability of the Brokerage House and the Financial Group and on the individual performance of each analyst. However, investors should note that analysts do not receive direct payment or compensation for any specific transaction in investment banking or in other business areas.

## Last-twelve-month activities of the business areas.

Grupo Financiero Banorte S.A.B. de C.V., through its business areas, provides services that include, among others, those corresponding to investment banking and corporate banking, to a large number of companies in Mexico and abroad. It may have provided, is providing or, in the future, will provide a service such as those mentioned to the companies or firms that are the subject of this report. Casa de Bolsa Banorte or its affiliates receive compensation from such corporations in consideration of the aforementioned services.

Over the course of the last twelve months, Grupo Financiero Banorte S.A.B. C.V., has not obtained compensation for services rendered by the investment bank or by any of its other business areas of the following companies or their subsidiaries, some of which could be analyzed within this report.

## Activities of the business areas during the next three months.

Casa de Bolsa Banorte, Grupo Financiero Banorte or its subsidiaries expect to receive or intend to obtain revenue from the services provided by investment banking or any other of its business areas, by issuers or their subsidiaries, some of which could be analyzed in this report.

## Securities holdings and other disclosures.

As of the end of last quarter, Grupo Financiero Banorte S.A.B. of C.V. has not held investments, directly or indirectly, in securities or derivative financial instruments, whose underlying securities are the subject of recommendations, representing 1% or more of its investment portfolio of outstanding securities or 1 % of the issuance or underlying of the securities issued.

None of the members of the Board of Grupo Financiero Banorte and Casa de Bolsa Banorte, along general managers and executives of an immediately below level, have any charges in the issuers that may be analyzed in this document.

The Analysts of Grupo Financiero Banorte S.A.B. of C.V. do not maintain direct investments or through an intermediary person, in the securities or derivative instruments object of this analysis report.

## Guide for investment recommendations.

	Reference
BUY	When the share expected performance is greater than the MEXBOL estimated performance.
HOLD	When the share expected performance is similar to the MEXBOL estimated performance.
SELL	When the share expected performance is lower than the MEXBOL estimated performance.

Even though this document offers a general criterion of investment, we urge readers to seek advice from their own Consultants or Financial Advisors, in order to consider whether any of the values mentioned in this report are in line with their investment goals, risk and financial position.

## Determination of Target Prices

For the calculation of estimated target prices for securities, analysts use a combination of methodologies generally accepted among financial analysts, including, but not limited to, multiples analysis, discounted cash flows, sum-of-the-parts or any other method that could be applicable in each specific case according to the current regulation. No guarantee can be given that the target prices calculated for the securities will be achieved by the analysts of Grupo Financiero Banorte S.A.B. C.V, since this depends on a large number of various endogenous and exogenous factors that affect the performance of the issuing company, the environment in which it performs, along with the influence of trends of the stock market, in which it is listed. Moreover, the investor must consider that the price of the securities or instruments can fluctuate against their interest and cause the partial and even total loss of the invested capital.
