

Industrial production – Construction weakness in August drags performance

- **Industrial production (August): -0.9% y/y nsa; Banorte: 0.3%; consensus: 0.4% (range: 0.2% to 1.1%); previous: 2.2%**
- **Industrial activity fell 0.5% m/m, ending with a three-month positive streak. It is worth noting that conditions seem to have improved externally, but some local challenges remain**
- **By sectors, we highlight the strong contraction in construction (-3.7%), with widespread losses inside. Meanwhile, manufacturing rose 0.3%, with 13 of its 21 categories higher and a special push from the auto sector. Lastly, mining climbed 0.1%, helped by volatility in 'related services'**
- **We expect a lateral path for industry towards the end of the year. Specifically, mixed conditions within manufacturing and construction, albeit with autos and edification providing support, respectively**

The annual print goes back into negative territory. Production fell 0.9% y/y (see [Chart 1](#)), below both consensus (0.4%) and our estimate (0.3%). Manufacturing was positive, up 0.1% ([Chart 2](#)). In contrast, construction fell 4.5% despite edification, which maintained its positive streak. Finally, mining has been in negative territory for 10 months, now at -1.2%. The month was characterized by a negative base effect and one less working day. Thus, with seasonally adjusted data, the result was slightly better at -0.3% y/y. For further details, please refer to [Table 1](#).

The positive sequential streak ends. Activity fell 0.5% m/m, its first decline after three months of improvements ([Chart 3](#)). In the period, equivalent figures in the US surprised positively, driven by manufacturing. However, the outlook kept giving mixed signals, highlighting heterogeneity within the sectors, as detailed below. Regarding domestic factors, construction maintained a positive bias in confidence levels, but job losses seem to have been an obstacle. In mining, volatility in services continues to dictate the result.

Construction fell 3.7% ([Table 2](#)). The decline was driven by edification at -4.0%, erasing last month's gain and giving us some pause about recent results. Meanwhile, civil engineering dropped by only 0.5%, suggesting a more normalized base effect as works on priority projects continue to be deployed. Specialized works contracted 1.0%, consistent with the results across the sector.

Manufacturing grew 0.3%, partly recovering from the 0.8% drop of the previous month. In the US, the rebound was significant at 0.9%, although [our country's manufacturing exports declined](#). In detail, 13 of the 21 categories were higher. The strongest increases were in plastics and rubber (+2.4%), transportation (+1.8%) –consistent with timely AMIA figures–, and metallic products (+1.5%), with a favorable base effect for the first two. The most relevant losses were in oil and carbon (-3.2%), electronics (-3.1%), and textile inputs (-1.1%).

Mining rose 0.1%. The main push came from an upward swing in 'related services', now at +3.9% –adding two months higher. Non-oil was flat (0.0%) despite the recovery of industrial metals' prices in the period. Lastly, the oil component fell 0.1%, contrasting with early figures that showed an increase in oil production, but with lower natural gas output.

for Mexico 2023

Document for distribution among the general public

In the very short-term, manufacturing will maintain a more lateral behavior, with construction heterogeneous. We believe that industry will continue to grow for the remainder of 2024, albeit at a more marginal pace. We would classify this as positive in a challenging domestic and external context. In 2025, some drivers within construction and mining are likely to translate into an improvement, although still with some uncertainty for manufacturing.

For 4Q24, the push will remain centered on the construction of industrial parks—remembering that, so far in 2024, the edification component has shown greater progress vs. the construction of civil engineering works. According to Claudia Esteves, general director of the *Mexican Association of Private Industrial Parks* (AMPIP in Spanish), 72 parks are being built nationwide in 2024 (vs. 50 in 2023 and 15 in 2019). In addition, the association reports that only 2.2% of the 80 million m2 of these spaces are available. Regarding manufacturing, we still expect US industry to remain constrained by factors such as input prices and a weakening of domestic and external demand. Hence, we stay cautious in general terms, expecting a lateral trend. Despite of the latter, it is worth noting the positive impact of auto parts and automotive assembly. In this regard, the Mexican Association of the Automotive Industry (AMIA in Spanish) reported that: *“If this pace is maintained [based on September’s production], there is a strong possibility that by the end of 2024 we will reach new production and export records...”*.

Towards 2025, some subsectors could regain dynamism and bring about a turnaround for industry. First, in mining, global demand for both energy and industrial metals could improve if: (1) There is an encouraging outcome from the counter-cyclical measures that China has begun to implement to reactivate its economy; (2) greater certainty for the investment environment in the US following the presidential election; and (3) the reactivation of global demand driven by an easing cycle by central banks. The last two factors could also imply that US manufacturing will recover dynamism. Finally, on the domestic front, the approval of the *2025 Budget*—which will presumably include some of the new administration’s flagship infrastructure projects, as well as some social programs aimed at housing edification— could imply greater dynamism for construction.

Analyst Certification.

We, Alejandro Padilla Santana, Juan Carlos Alderete Macal, Alejandro Cervantes Llamas, Marissa Garza Ostos, Katia Celina Goya Ostos, Francisco José Flores Serrano, José Luis García Casales, Santiago Leal Singer, Víctor Hugo Cortes Castro, Leslie Thalía Orozco Vélez, Hugo Armando Gómez Solís, Carlos Hernández García, Yazmín Selene Pérez Enríquez, Cintia Gisela Nava Roa, Miguel Alejandro Calvo Domínguez, José De Jesús Ramírez Martínez, Daniel Sebastián Sosa Aguilar, Gerardo Daniel Valle Trujillo, Luis Leopoldo López Salinas, Marcos Saúl García Hernández, Juan Carlos Mercado Garduño, Ana Gabriela Martínez Mosqueda, Jazmín Daniela Cuautencos Mora, Andrea Muñoz Sánchez and Paula Lozoya Valadez, certify that the points of view expressed in this document are a faithful reflection of our personal opinion on the company (s) or firm (s) within this report, along with its affiliates and/or securities issued. Moreover, we also state that we have not received, nor receive, or will receive compensation other than that of Grupo Financiero Banorte S.A.B. of C.V. for the provision of our services.

Relevant statements.

In accordance with current laws and internal procedures manuals, analysts are allowed to hold long or short positions in shares or securities issued by companies that are listed on the Mexican Stock Exchange and may be the subject of this report; nonetheless, equity analysts have to adhere to certain rules that regulate their participation in the market in order to prevent, among other things, the use of private information for their benefit and to avoid conflicts of interest. Analysts shall refrain from investing and holding transactions with securities or derivative instruments directly or through an intermediary person, with Securities subject to research reports, from 30 calendar days prior to the issuance date of the report in question, and up to 10 calendar days after its distribution date.

Compensation of Analysts.

Analysts' compensation is based on activities and services that are aimed at benefiting the investment clients of Casa de Bolsa Banorte and its subsidiaries. Such compensation is determined based on the general profitability of the Brokerage House and the Financial Group and on the individual performance of each analyst. However, investors should note that analysts do not receive direct payment or compensation for any specific transaction in investment banking or in other business areas.

Last-twelve-month activities of the business areas.

Grupo Financiero Banorte S.A.B. de C.V., through its business areas, provides services that include, among others, those corresponding to investment banking and corporate banking, to a large number of companies in Mexico and abroad. It may have provided, is providing or, in the future, will provide a service such as those mentioned to the companies or firms that are the subject of this report. Casa de Bolsa Banorte or its affiliates receive compensation from such corporations in consideration of the aforementioned services.

Over the course of the last twelve months, Grupo Financiero Banorte S.A.B. C.V., has not obtained compensation for services rendered by the investment bank or by any of its other business areas of the following companies or their subsidiaries, some of which could be analyzed within this report.

Activities of the business areas during the next three months.

Casa de Bolsa Banorte, Grupo Financiero Banorte or its subsidiaries expect to receive or intend to obtain revenue from the services provided by investment banking or any other of its business areas, by issuers or their subsidiaries, some of which could be analyzed in this report.

Securities holdings and other disclosures.

As of the end of last quarter, Grupo Financiero Banorte S.A.B. of C.V. has not held investments, directly or indirectly, in securities or derivative financial instruments, whose underlying securities are the subject of recommendations, representing 1% or more of its investment portfolio of outstanding securities or 1 % of the issuance or underlying of the securities issued.

None of the members of the Board of Grupo Financiero Banorte and Casa de Bolsa Banorte, along general managers and executives of an immediately below level, have any charges in the issuers that may be analyzed in this document.

The Analysts of Grupo Financiero Banorte S.A.B. of C.V. do not maintain direct investments or through an intermediary person, in the securities or derivative instruments object of this analysis report.

Guide for investment recommendations.

	Reference
BUY	When the share expected performance is greater than the MEXBOL estimated performance.
HOLD	When the share expected performance is similar to the MEXBOL estimated performance.
SELL	When the share expected performance is lower than the MEXBOL estimated performance.

Even though this document offers a general criterion of investment, we urge readers to seek advice from their own Consultants or Financial Advisors, in order to consider whether any of the values mentioned in this report are in line with their investment goals, risk and financial position.

Determination of Target Prices

For the calculation of estimated target prices for securities, analysts use a combination of methodologies generally accepted among financial analysts, including, but not limited to, multiples analysis, discounted cash flows, sum-of-the-parts or any other method that could be applicable in each specific case according to the current regulation. No guarantee can be given that the target prices calculated for the securities will be achieved by the analysts of Grupo Financiero Banorte S.A.B. C.V, since this depends on a large number of various endogenous and exogenous factors that affect the performance of the issuing company, the environment in which it performs, along with the influence of trends of the stock market, in which it is listed. Moreover, the investor must consider that the price of the securities or instruments can fluctuate against their interest and cause the partial and even total loss of the invested capital.

The information contained hereby has been obtained from sources that we consider to be reliable, but we make no representation as to its accuracy or completeness. The information, estimations and recommendations included in this document are valid as of the issue date, but are subject to modifications and changes without prior notice; Grupo Financiero Banorte S.A.B. of C.V. does not commit to communicate the changes and also to keep the content of this document updated. Grupo Financiero Banorte S.A.B. of C.V. takes no responsibility for any loss arising from the use of this report or its content. This document may not be photocopied, quoted, disclosed, used, or reproduced in whole or in part without prior written authorization from Grupo Financiero Banorte S.A.B. of C.V.
