

Domestic demand – Mixed signals in October, but the deceleration trend prevailed

- **Gross fixed investment (October): -2.6% y/y (nsa); Banorte: -2.0%; consensus: -2.8% (range: -4.2% to -1.0%); previous: -2.9%**
- **Private consumption (October): 1.4% y/y (nsa); Banorte: 2.9%; consensus: 1.4% (range: 0.4% to 2.9%); previous: 0.9%**
- **Investment grew 0.1% m/m after two months of declines. Inside, machinery and equipment came in +1.2%, with dynamism centered in the imported component. Construction fell 0.9%, with relevant losses in the non-residential component**
- **Consumption contracted 0.7% m/m, adding two months to the downside. The domestic item was the main drag at -1.0% –caused by a setback in goods (-1.5%)–, with the imported branch at -0.5%**
- **We believe some of the headwinds seen in 4Q24 will remain in place in 2025, especially in the first half of the year. Consumption will be the driver of domestic demand, with investment more subdued considering greater challenges for an acceleration**

Investment stalls in the tenth month of the year. GFI came in at -2.6% y/y in October ([Chart 1](#)), close to consensus (-2.8%). The calendar effect was positive –with one more working day in the annual comparison. Thus, with seasonally adjusted figures the result was lower at -4.5% y/y. Back to original figures, machinery and equipment returned to positive at 7.8%. Inside, advances were registered in both items, with the domestic one leading by 8.3% and the imported branch slightly lower at 7.5%. In contrast, construction was negative for a third consecutive month at -11.0%, with weakness centered in the non-residential component at -16.6%. Additional details are presented in [Table 1](#).

Regarding monthly figures, investment climbed just 0.1% m/m ([Chart 3](#)) after two months of sharp losses. Construction contracted again, now by -0.9%. This figure contrasts with the results for this sector in industrial production, although it is consistent with the decline in ‘mining-related services’. In this sense, the non-residential sector contracted 2.4%, while the residential branch a 1.5% –rather positive considering the +6.0% in the previous month. Machinery and equipment rebounded 1.2%, with imports leading at 3.7%, but with the domestic one falling 1.6%. On the former, the main boost was in ‘others’ (4.6%), with transportation more restrained (1.0%). For more details see [Table 2](#).

Consumption takes a step back. In annual terms, the total grew 1.4% ([Chart 5](#)), also supported by an additional working day. With seasonally adjusted figures, the print was lower at 0.5% y/y ([Table 3](#)), similar to investment. On fundamentals, their behavior was mixed. In the [labor market](#), more than 400 thousand jobs were created, with the unemployment rate at a historical low, although with real wages moderating slightly. [Remittances](#) marked a new sequential decline, while [consumer credit](#) remained somewhat stable. Inside, the imported item came in at 6.0%, with semi-durable goods (27.4%) remaining as the highest. The domestic branch rose 0.7%, with services resilient at 1.5%, although with goods down by 0.1% –with non-durable goods (-1.1%) concentrating losses.

On a sequential basis, consumption declined 0.7%, adding to September’s losses ([Chart 7](#)). This is largely explained by the -1.0% in the domestic item –with the largest decline in goods (-1.5%), while services were more modest (-0.3%). On the other hand, the imported item contracted by 0.5%, as shown in [Table 4](#).

Winners of the award as the best economic forecasters in Mexico by LSEG in 2023

**LSEG STARLINE
AWARD FOR
REUTERS POLLS**
Best Forecaster
Economic Indicators
for Mexico 2023

Domestic demand in 2025 will rely on consumption. The end of 2024 implied lower dynamism vs. 3Q24, with investment suffering more from the uncertainty of the upcoming change in the US administration. Consumption would have moderated by a lesser magnitude, with a favorable seasonality due to end-of-year purchases. Looking into 2025, domestic demand and activity in general will be mainly supported by consumption as external demand may remain somewhat weak. We anticipate that consumption will have more limited growth during the first half of the year, gaining momentum as the months go by. For investment, the outlook will be similar, albeit without ruling out a contraction in 1H25.

Delving deeper into consumption, November would have been the month that boosted results in 4Q24. ANTAD same-store sales grew 4.5% y/y in real terms. In addition, sales during *El Buen Fin* increased by 15.1% y/y (\$173.8 billion) according to Concanaco-Servytur. Looking ahead to 2025, some positive factors will be in place at the beginning of the year, such as the [12% minimum wage hike](#), new social programs, and the increase in real terms of those already established. However, fundamentals may be heterogeneous given more complex economic factors. In this regard, we will be looking into the net effect of US immigration policies on remittances, as well as employment demand—especially at the beginning of the year and in the formal sector.

For investment, headwinds are more palpable and were evident at least since 4Q24. Fiscal consolidation—which implies lower government spending on physical investment—as well as the uncertainty caused by Trump’s protectionist discourse are the main brakes. Focusing on domestic issues, the federal government presented this week the *Plan Mexico*, a strategy that includes industrial and trade policies with an eye on economic growth framed within the 2025-2030 National Development Plan. Although the figures presented are for the six-year period, they are a starting point on expectations about investment. We recall that the budget allocated for government infrastructure works in 2025 stands at \$800 billion. Thus, one of the aspects to highlight is the focus on investment. Firstly, one of the goals is for the country to attract US\$100 billion in FDI by 2030 and to achieve US\$277 billion in total investments, with an estimated 2,000 potential projects. Highlighted sectors included textiles, automotive, pharmaceutical, agribusiness, and semiconductors. Another relevant point was the figure of mixed investment, which according to President Claudia Sheinbaum, differs from the concept of public-private partnership since it will now be understood as an investment with a better balance of risks between the government and the private sector. Under this scheme, it is estimated that private investment could amount to \$54.3 billion over the next six years.

Analyst Certification.

We, Alejandro Padilla Santana, Juan Carlos Alderete Macal, Alejandro Cervantes Llamas, Marissa Garza Ostos, Katia Celina Goya Ostos, Francisco José Flores Serrano, José Luis García Casales, Santiago Leal Singer, Víctor Hugo Cortes Castro, Leslie Thalia Orozco Vélez, Hugo Armando Gómez Solís, Carlos Hernández García, Yazmín Selene Pérez Enríquez, Cintia Gisela Nava Roa, José De Jesús Ramírez Martínez, Daniel Sebastián Sosa Aguilar, Gerardo Daniel Valle Trujillo, Luis Leopoldo López Salinas, Marcos Saúl García Hernandez, Juan Carlos Mercado Garduño, Ana Gabriela Martínez Mosqueda, Ana Laura Zaragoza Félix, Jazmin Daniela Cuautencos Mora, Andrea Muñoz Sánchez and Paula Lozoya Valadez, certify that the points of view expressed in this document are a faithful reflection of our personal opinion on the company (s) or firm (s) within this report, along with its affiliates and/or securities issued. Moreover, we also state that we have not received, nor receive, or will receive compensation other than that of Grupo Financiero Banorte S.A.B. of C.V for the provision of our services.

Relevant statements.

In accordance with current laws and internal procedures manuals, analysts are allowed to hold long or short positions in shares or securities issued by companies that are listed on the Mexican Stock Exchange and may be the subject of this report; nonetheless, equity analysts have to adhere to certain rules that regulate their participation in the market in order to prevent, among other things, the use of private information for their benefit and to avoid conflicts of interest. Analysts shall refrain from investing and holding transactions with securities or derivative instruments directly or through an intermediary person, with Securities subject to research reports, from 30 calendar days prior to the issuance date of the report in question, and up to 10 calendar days after its distribution date.

Compensation of Analysts.

Analysts' compensation is based on activities and services that are aimed at benefiting the investment clients of Casa de Bolsa Banorte and its subsidiaries. Such compensation is determined based on the general profitability of the Brokerage House and the Financial Group and on the individual performance of each analyst. However, investors should note that analysts do not receive direct payment or compensation for any specific transaction in investment banking or in other business areas.

Last-twelve-month activities of the business areas.

Grupo Financiero Banorte S.A.B. de C.V., through its business areas, provides services that include, among others, those corresponding to investment banking and corporate banking, to a large number of companies in Mexico and abroad. It may have provided, is providing or, in the future, will provide a service such as those mentioned to the companies or firms that are the subject of this report. Casa de Bolsa Banorte or its affiliates receive compensation from such corporations in consideration of the aforementioned services.

Over the course of the last twelve months, Grupo Financiero Banorte S.A.B. C.V., has not obtained compensation for services rendered by the investment bank or by any of its other business areas of the following companies or their subsidiaries, some of which could be analyzed within this report.

Activities of the business areas during the next three months.

Casa de Bolsa Banorte, Grupo Financiero Banorte or its subsidiaries expect to receive or intend to obtain revenue from the services provided by investment banking or any other of its business areas, by issuers or their subsidiaries, some of which could be analyzed in this report.

Securities holdings and other disclosures.

As of the end of last quarter, Grupo Financiero Banorte S.A.B. of C.V. has not held investments, directly or indirectly, in securities or derivative financial instruments, whose underlying securities are the subject of recommendations, representing 1% or more of its investment portfolio of outstanding securities or 1 % of the issuance or underlying of the securities issued.

None of the members of the Board of Grupo Financiero Banorte and Casa de Bolsa Banorte, along general managers and executives of an immediately below level, have any charges in the issuers that may be analyzed in this document.

The Analysts of Grupo Financiero Banorte S.A.B. of C.V. do not maintain direct investments or through an intermediary person, in the securities or derivative instruments object of this analysis report.

Guide for investment recommendations.

	Reference
BUY	When the share expected performance is greater than the MEXBOL estimated performance.
HOLD	When the share expected performance is similar to the MEXBOL estimated performance.
SELL	When the share expected performance is lower than the MEXBOL estimated performance.

Even though this document offers a general criterion of investment, we urge readers to seek advice from their own Consultants or Financial Advisors, in order to consider whether any of the values mentioned in this report are in line with their investment goals, risk and financial position.

Determination of Target Prices

For the calculation of estimated target prices for securities, analysts use a combination of methodologies generally accepted among financial analysts, including, but not limited to, multiples analysis, discounted cash flows, sum-of-the-parts or any other method that could be applicable in each specific case according to the current regulation. No guarantee can be given that the target prices calculated for the securities will be achieved by the analysts of Grupo Financiero Banorte S.A.B. C.V, since this depends on a large number of various endogenous and exogenous factors that affect the performance of the issuing company, the environment in which it performs, along with the influence of trends of the stock market, in which it is listed. Moreover, the investor must consider that the price of the securities or instruments can fluctuate against their interest and cause the partial and even total loss of the invested capital.

The information contained hereby has been obtained from sources that we consider to be reliable, but we make no representation as to its accuracy or completeness. The information, estimations and recommendations included in this document are valid as of the issue date, but are subject to modifications and changes without prior notice; Grupo Financiero Banorte S.A.B. of C.V. does not commit to communicate the changes and also to keep the content of this document updated. Grupo Financiero Banorte S.A.B. of C.V. takes no responsibility for any loss arising from the use of this report or its content. This document may not be photocopied, quoted, disclosed, used, or reproduced in whole or in part without prior written authorization from Grupo Financiero Banorte S.A.B. of C.V.
