Glossary

Glossary

- **Employment gap:** Difference between the actual employment level of an economy and the level of employment that is considered optimal or sustainable in the long-term, known as full employment. It represents the underutilization (negative) or overutilization (positive) of the workforce. At full employment, the gap is zero
- **Informal employment - Working in the formal sector:** All work performed in formal companies or institutions but without access to social benefits or an employment contract
- **Informal employment - Working in the informal sector:** All work performed in an unincorporated economic unit that operates from household resources, and that does not keep an accounting record of its activity, regardless of the working conditions that exist
- **Unemployed population:** +15 years old people who in the reference week looked for work because they were not linked to an economic activity or work
- **Labor force (currently active population):** +15 years old people who had a link with economic activity or who sought it in the reference week, and who were therefore employed or unemployed
- **People outside of the labor force:** +15 years old people who in the reference week only carried out non-economic activities and did not look for work
- **Employed people:** +15 years old people who in the reference week did some economic activity for at least one hour. Includes employed people who had a job, but did not do it temporarily for some reason, without thereby losing their employment link with it; as well as those who helped in some economic activity without receiving a wage
- **Daily wage (INEGI):** It is constructed by multiplying the hourly wage by eight times
- **Unemployment rate:** It is the proportion of the labor force that is openly unemployed in the reference period
- **Expanded unemployment rate:** It is the proportion of the labor force and the population that is available for work even if they have given up looking for work, or that will start work soon
- **Participation rate:** Percentage that the labor force represents with respect to those +15 years old
- **Part-time workers rate:** Percentage of the labor force that has the need and availability to offer more work time than their current occupation allows

Annexes

Minimum wage

Minimum wage

\$, % y/y

Source: Banorte with data from CONASAMI and Official Gazette

Relevant points

- The minimum wage (MW) is the minimum amount received per workday, and was established in 1931
- The National Commission on Minimum Wages (CONASAMI in Spanish) is an agency of the Ministry of Labor authorized to determine the increase in the MW for the next year
- The CONASAMI Board of Representatives considers variables such as the cost of living, labor market conditions, and salary structures to establish –by consensus– the percentage of annual increase in the MW. The Council is made up of 11 worker representatives, 11 employer representatives, and only one government representative
- In 2016, by decree, the process of deindexing the MW from various legal requirements unrelated to remuneration matters (e.g. sanctions, rights, or administrative paperwork) was completed. Thus, the MW was replaced cover these purposes by the Measurement and Adjustment Unit (UMA in Spanish) used as a unit of account, index, base, measure or reference to determine the amount of payment of the federal or local government obligations
- As of 2019, the geographic area MW was eliminated, and the division of the Northern Border Free Zone (ZLFN in Spanish) MW and the rest of the country MW was established
- The Independent Recovery Amount (MIR in Spanish) has as its main objective to increase significantly the MW without affecting wage negotiations in collective contracts, thus it is applied as a direct adjustment to the MW
- For the 2024-2030 six-year term, the federal government objective is to reach a minimum wage equivalent to 2.5 times the Urban Income Poverty Line by 2030

Minimum wage 2030 target

Federal government's two goals on the minimum wage

2026 goal
Equivalent to 2 times the
Urban Income Poverty
Line (UIPL)

2030 goal
2.5 times UIPL

A 12% y/y nominal increase would be enough to reach both goals
as long as the average inflation no do not surpass a 4% y/y

Urban Income Poverty Line and minimum wage

Mexico moves towards reducing working hours

Initiative of the Executive Branch

- On May 1st, President Claudia Sheinbaum announced that an appropriate consensus will be sought to reduce the workweek from 48 to 40 hours
- A gradual approach is proposed, aiming to reach 40 hours by 2030
- The reform will involve amending Articles 61 and 69 of the Federal Labor Law
- Forums of discussion will be held between June 19th and July 7th in CDMX, GDL, MTY, TIJ, QRO, CUN, with participation from unions, companies, academics, international organizations, among others
- The Project will be submitted to the Mexican Congress for review during the next ordinary session period (Sep. 2025)

Statement from key stakeholders

- Coparmex: The reform must involve dialogue, and economic realism. A reduction without increased productivity could lead to a deterioration in formal employment. Gradualness not only of time, but also considering sectoral matters and company size
- Adecco Group estimated the paying for overtime –to maintain production– would increase labor costs by +36%
- Concanaco-Servytur: MSMEs require support to face the reform, they propose differentiated legislation with incentives for those companies
- The National Food and Commerce Union “...Let’s start a pilot program based on mutual commitments.”
- JUCOPO: We are not going to act rashly

Encuesta CONCANACO-CANACINTRA*

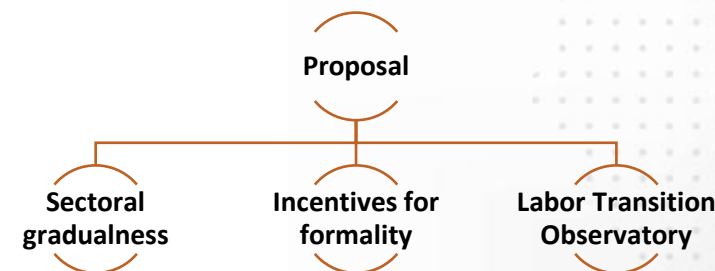

64% of business leaders view the reduction as unsustainable

71% would experience an increase in operating costs

59% would have trouble in staffing shifts or maintaining the same level of service

67% are requesting a tax reduction to provide support for covering the increased cost

Concerns: increase in labor costs, negative impact on the consumer and loss of jobs

*CONCANACO-SERVYTUR CANACINTRA Work Hours Survey in Mexico 2025 conducted in May 2025 among 1200 business owners. Source: Banorte with information from the Office of the President, CONCANACO-SERVYTUR, various media outlets

International evidence

International Labor Organization (ILO) Recommendation 116

Guidelines: Reduction of the working hours

Sectoral
evaluation

Progressive
reduction

Flexibility
under certain
aspects

Inflationary
pressures
must be
avoided

Prioritize
industries and
roles that involve
significant
physical or
mental strain, or
pose a health
risk

Production
and/or
productivity
must not be
negatively
impacted

The development of new industries or their capacity to
compete in international trade must not be negatively
affected

Evidence in other countries

Chile:

Reduction from 45 hours in 2024 to 40 hours in 2028.

Gradual implementation, every two years, reduction of 3 and then 2 hours, reaching 40 hours in 2028.

Flexibility measures to be included (e.g., exceptional work schedules, adjustments for SMEs).

Colombia:

From 48 hours in 2023 to 42 hours in 2026.

Without differentiation by sector or company size.

OCDE: Hours worked

Hours per employee in a week, 2024

*Source: ILO, OCDE, Fuente: OIT, OCDE, governments of Chile and Colombia

Distribution of employed people by weekly hours worked

Employed people and their distribution by employment condition and hours worked*

Millions

Key points

- The **employed population** could be in either the **formal or informal sector**
- **Some workers have more than one employer**
- The **ENOE** allows us to know the **number of hours worked**
- The **target population for the reform to reduce the workweek would be around 15.3 million**. This figure considers **formal workers with single employer working more than 40 hours**
- If the **effect extends to the informal population**, the **number of workers who could benefit from the measure would rise to 30.1 million** (considering 14.8 million informal workers)

*Figures consider data from 1Q25. Source: Banorte with data from INEGI

The biggest adjustments will be on manufacturing, commerce, and other services, with a strong correlation to company size

Analyst Certification.

We, Alejandro Padilla Santana, Juan Carlos Alderete Macal, Alejandro Cervantes Llamas, Marissa Garza Ostos, Katia Celina Goya Ostos, Francisco José Flores Serrano, José Luis García Casales, Santiago Leal Singer, Víctor Hugo Cortes Castro, Leslie Thalía Orozco Vélez, Hugo Armando Gómez Solís, Carlos Hernández García, Yazmín Selene Pérez Enriquez, Cintia Gisela Nava Roa, José De Jesús Ramírez Martínez, Daniel Sebastián Sosa Aguilar, Gerardo Daniel Valle Trujillo, Ana Laura Zaragoza Félix, Luis Leopoldo López Salinas, Marcos Saúl García Hernandez, Juan Carlos Mercado Garduño, Jazmin Daniela Cuautencos Mora, Andrea Muñoz Sánchez and Paula Lozoya Valadez (hereinafter the “Stock Market Analysts” and/or the “Analysts”) certify that the points of view expressed in this document are a faithful reflection of our personal opinion on the company (s) or firm (s) within this report, along with its affiliates and/or securities issued. Moreover, we also state that we have not received, or will receive compensation other than that of Grupo Financiero Banorte S.A.B. of C.V (hereinafter “Grupo Financiero Banorte”) for the provision of our services.

Relevant statements.

In accordance with current laws and internal procedures manuals, analysts are allowed to hold long or short positions in shares or securities issued by companies that are listed on the Mexican Stock Exchange and may be the subject of this report; nonetheless, equity analysts have to adhere to certain rules that regulate their participation in the market in order to prevent, among other things, the use of private information for their benefit and to avoid conflicts of interest. Analysts shall refrain from investing and holding transactions with securities or derivative instruments directly or through an intermediary person, with Securities subject to research reports, from 30 calendar days prior to the issuance date of the report in question, and up to 10 calendar days after its distribution date.

Compensation of Analysts.

Analysts’ compensation is based on activities and services that are aimed at providing information to the investment clients of Casa de Bolsa Banorte and its subsidiaries. Such compensation is determined based on the general profitability of the Brokerage House and the Financial Group and on the individual performance of each analyst. However, investors should note that analysts do not receive direct payment or compensation for any specific transaction in investment banking or in other business areas.

Last-twelve-month activities of the business areas

Grupo Financiero Banorte S.A.B. de C.V., through its business areas, provides services that include, among others, those corresponding to investment banking and corporate banking, to a large number of companies in Mexico and abroad. It may have provided, is providing or, in the future, will provide a service such as those mentioned to the companies or firms that are the subject of this report. Casa de Bolsa Banorte or its affiliates receive compensation from such corporations in consideration of the afore mentioned services.

Over the course of the last twelve months, Grupo Financiero Banorte S.A.B. of C.V., has not obtained compensation for services rendered by the investment bank or by any of its other business areas of the following companies or their subsidiaries, some of which could be analyzed within this report.

Activities of the business areas during the next three months.

Grupo Financiero Banorte, Casa de Bolsa Banorte or its subsidiaries expect to receive or intend to obtain revenue from the services provided by investment banking or any other of its business areas, by issuers or their subsidiaries, some of which could be analyzed in this report.

Securities holdings and other disclosures.

As of the end of last quarter, Grupo Financiero Banorte S.A.B. of C.V. has not held investments, directly or indirectly, in securities or derivative financial instruments, whose underlying securities are the subject of recommendations, representing 1% or more of its investment portfolio of outstanding securities or 1 % of the issuance or underlying of the securities issued.

None of the members of the Board of Grupo Financiero Banorte and Casa de Bolsa Banorte, along general managers and executives of an immediately below level, have any charges in the issuers that may be analyzed in this document.

The Analysts of Grupo Financiero Banorte S.A.B. of C.V. do not maintain direct investments or through an intermediary person, in the securities or derivative instruments object of this analysis report.

Determination of Target Prices

For the calculation of estimated target prices for securities, analysts use a combination of methodologies generally accepted among financial analysts, including, but not limited to, multiples analysis, discounted cash flows, sum-of-the-parts or any other method that could be applicable in each specific case according to the current regulation. No guarantee can be given that the target prices calculated for the securities will be achieved by the analysts of Grupo Financiero Banorte S.A.B. de C.V, since this depends on various endogenous and exogenous factors that affect the performance of the issuing company, the environment in which it performs, along with the influence of trends of the stock market, in which it is listed. Moreover, the investor must consider that the price of the securities or instruments can fluctuate against their interest and cause the partial and even total loss of the invested capital.
