

3Q23 GDP – Dynamism reaffirmed, boosted by all three sectors

- Gross Domestic Product (3Q23 F, nsa): 3.3% y/y; Banorte: 3.2%; consensus: 3.2% (range: 3.2% to 3.3%); preliminary: 3.3%
- Gross Domestic Product (3Q23 F, sa): 1.1% q/q; Banorte: 0.9%; consensus: 0.8% (range: 0.4% to 0.9%); preliminary: 0.9%
- Revisions were mixed, but the final result remains quite favorable. The largest change was in agriculture to 2.6% q/q (-51bps), followed by services at 0.9% (+33bps). Finally, industry was more stable at 1.3% (-5bps)
- Consistent with this, September's GDP-proxy IGAE came in at 0.6% m/m (3.3% y/y), adding a sixth month of improvements. Industry was supported by manufacturing, with services more mixed inside
- We believe dynamism will extend to the end of the year, albeit with a more modest pace. This is consistent with our view of full-year GDP at 3.3%. In addition, positive factors in 1H24 would contribute to our forecast of 2.4% growth in 2024

Stability in 3Q23 GDP. The report showed that the economy grew 3.3% in the third quarter (see [Chart 1](#)), representing barely a +1bps revision relative to the [preliminary print](#). Industry was lower, standing at 4.3% (-14bps) as seen in [Chart 2](#). Services and primary activities were adjusted higher, coming in at 2.7% (+13bps) and 5.7% (+12bps), respectively. With these results, activity accumulated a 3.4% increase so far in the year ([Table 1](#)).

The economy keeps growing at high rates. GDP climbed 1.1% q/q ([Chart 3](#)) –adjusting by +16bps relative to the preliminary figure–, adding eight quarters in expansion. This had not been seen since 2013-2015 ([Chart 5](#)). By sectors, two of the three large branches were revised lower. The most substantial change was in primary activities, down by 51bps to 2.6%. Nevertheless, the result is still quite positive, especially considering harsh droughts during the summer. Industry was also revised in the same direction, albeit more modestly as it stood at 1.3% (-5bps), as seen in [Chart 4](#). Despite a moderation in the last month of the quarter –see section ahead–, construction remained as the main driver at 6.8%. Based on monthly reports, the push came mainly from civil engineering works. In mining (-2.0%), performance was limited by an accident in a PEMEX oil rig, with volatility persisting in ‘services related to the sector’. Meanwhile, manufacturing grew 0.4%, recognizing a relevant rebound in September. Inside, a heterogeneous performance prevails, with some sectors such as autos showing strength –despite the workers’ strike in the US–, while others, such as textiles, have shown more weakness.

Services were stronger at 0.9% (+33bps). Despite a smaller rate compared to the other two categories, dynamism continued supported by solid fundamentals, MXN strength, and a moderation in inflationary pressures. Consistent with this, 11 of the 15 categories improved. The expansion was led by lodging (3.6%), retail sales (3.5%) and business support (3.2%). On the contrary, entertainment declined 7.6%, facing a rather challenging base effect (previous: 12.4%). Other sectors with declines included corporates (-1.3%), financials (-1.4%), and wholesales (-0.7%). For further details, please refer to [Table 4](#).

#1 OVERALL FORECASTER - MEXICO

Document for distribution among the general public

Activity kept growing in September, gathering additional momentum. INEGI also published the monthly GDP-proxy IGAE for the last month of the period, standing at 3.3% (Banorte: 3.1%; consensus: 3.0%). This implies 0.6% m/m, its highest pace since April. As already known, [industry](#) (0.2%) was driven by manufacturing –with a relevant push from the auto sector–, although limited by construction and mining. Services grew 0.9% with 8 of its 14 sectors improving. We note increases in professional (2.9%) and support services (2.5%), along a push in lodging (1.9%). Entertainment (-1.9%) and government (-1.4%) led the move lower.

We expect sequential increases in the following three quarters, with relevant drivers in 1H24. Considering that the final figure was practically in line with our estimate, we maintain our call of 3.3% full-year GDP growth. This implies 0.3% q/q (2.8% a/a) in the last quarter (see [Table 2](#) and [Table 3](#)). The moderation would respond to several factors, including: (1) The negative spillover from the autoworkers strike in the US –expecting to see the first effects in October's trade balance on Monday; (2) a moderation in the pace of consumption, with renewed price pressures offsetting the consolidation in fundamentals; (3) a negative base effect after eight quarters of relevant increases; and (4) a lower boost from external demand, with a more challenging global outlook.

Nevertheless, we think that the first half of 2024 will be benefited by several factors. Dynamism would be concentrated in 1Q24 with a 1.0% q/q expansion. Some of the drivers include: (1) The pre-payment of social programs in order to comply with electoral rules; (2) the boost in infrastructure spending to finish priority projects before the June 2nd election. However, a more consistent tailwind could be construction works in the industrial sector. In this sense, demand for industrial spaces has kept climbing in the last few months, which should continue pushing the sector. According to real estate research firm *Solili*, demand for this type of spaces increased by 37% relative to October 2022, with Monterrey, Tijuana, and Saltillo among the cities attracting more interest. For the second half we identify more relevant challenges, expecting sequential declines in 3Q24 (-0.7% q/q) and 4Q24 (-0.8% q/q). Specifically, more challenging bases and the effects of a larger spending in the first semester –leaving fewer resources for this part of the year– will impact local conditions. We must add a more difficult global backdrop –which will likely materialize earlier in the year–, triggered by a more pronounced slowdown in US consumption due to tighter credit conditions (*e.g.* higher interest rates, heftier interest payments, and the resumption of student loan repayments, among others). Considering this, we reaffirm our call of a 2.4% full-year GDP expansion.

Analyst Certification.

We, Alejandro Padilla Santana, Juan Carlos Alderete Macal, Alejandro Cervantes Llamas, Manuel Jiménez Zaldívar, Marissa Garza Ostos, Katia Celina Goya Ostos, Francisco José Flores Serrano, José Luis García Casales, Víctor Hugo Cortes Castro, José Itzamna Espitia Hernández, Carlos Hernández García, Leslie Thalia Orozco Vélez, Hugo Armando Gómez Solís, Yazmín Selene Pérez Enríquez, Cintia Gisela Nava Roa, Miguel Alejandro Calvo Domínguez, José De Jesús Ramírez Martínez, Gerardo Daniel Valle Trujillo, Luis Leopoldo López Salinas, Isaías Rodríguez Sobrino, Juan Carlos Mercado Garduño, Paula Lozoya Valadez, Daniel Sebastián Sosa Aguilar, Jazmin Daniela Cautencos Mora and Andrea Muñoz Sánchez, certify that the points of view expressed in this document are a faithful reflection of our personal opinion on the company (s) or firm (s) within this report, along with its affiliates and/or securities issued. Moreover, we also state that we have not received, nor receive, or will receive compensation other than that of Grupo Financiero Banorte S.A.B. of C.V. for the provision of our services.

Relevant statements.

In accordance with current laws and internal procedures manuals, analysts are allowed to hold long or short positions in shares or securities issued by companies that are listed on the Mexican Stock Exchange and may be the subject of this report; nonetheless, equity analysts have to adhere to certain rules that regulate their participation in the market in order to prevent, among other things, the use of private information for their benefit and to avoid conflicts of interest. Analysts shall refrain from investing and holding transactions with securities or derivative instruments directly or through an intermediary person, with Securities subject to research reports, from 30 calendar days prior to the issuance date of the report in question, and up to 10 calendar days after its distribution date.

Compensation of Analysts.

Analysts' compensation is based on activities and services that are aimed at benefiting the investment clients of Casa de Bolsa Banorte and its subsidiaries. Such compensation is determined based on the general profitability of the Brokerage House and the Financial Group and on the individual performance of each analyst. However, investors should note that analysts do not receive direct payment or compensation for any specific transaction in investment banking or in other business areas.

Last-twelve-month activities of the business areas.

Grupo Financiero Banorte S.A.B. de C.V., through its business areas, provides services that include, among others, those corresponding to investment banking and corporate banking, to a large number of companies in Mexico and abroad. It may have provided, is providing or, in the future, will provide a service such as those mentioned to the companies or firms that are the subject of this report. Casa de Bolsa Banorte or its affiliates receive compensation from such corporations in consideration of the aforementioned services.

Over the course of the last twelve months, Grupo Financiero Banorte S.A.B. C.V., has not obtained compensation for services rendered by the investment bank or by any of its other business areas of the following companies or their subsidiaries, some of which could be analyzed within this report.

Activities of the business areas during the next three months.

Casa de Bolsa Banorte, Grupo Financiero Banorte or its subsidiaries expect to receive or intend to obtain revenue from the services provided by investment banking or any other of its business areas, by issuers or their subsidiaries, some of which could be analyzed in this report.

Securities holdings and other disclosures.

As of the end of last quarter, Grupo Financiero Banorte S.A.B. of C.V. has not held investments, directly or indirectly, in securities or derivative financial instruments, whose underlying securities are the subject of recommendations, representing 1% or more of its investment portfolio of outstanding securities or 1 % of the issuance or underlying of the securities issued.

None of the members of the Board of Grupo Financiero Banorte and Casa de Bolsa Banorte, along general managers and executives of an immediately below level, have any charges in the issuers that may be analyzed in this document.

The Analysts of Grupo Financiero Banorte S.A.B. of C.V. do not maintain direct investments or through an intermediary person, in the securities or derivative instruments object of this analysis report.

Guide for investment recommendations.

	Reference
BUY	When the share expected performance is greater than the MEXBOL estimated performance.
HOLD	When the share expected performance is similar to the MEXBOL estimated performance.
SELL	When the share expected performance is lower than the MEXBOL estimated performance.

Even though this document offers a general criterion of investment, we urge readers to seek advice from their own Consultants or Financial Advisors, in order to consider whether any of the values mentioned in this report are in line with their investment goals, risk and financial position.

Determination of Target Prices

For the calculation of estimated target prices for securities, analysts use a combination of methodologies generally accepted among financial analysts, including, but not limited to, multiples analysis, discounted cash flows, sum-of-the-parts or any other method that could be applicable in each specific case according to the current regulation. No guarantee can be given that the target prices calculated for the securities will be achieved by the analysts of Grupo Financiero Banorte S.A.B. C.V, since this depends on a large number of various endogenous and exogenous factors that affect the performance of the issuing company, the environment in which it performs, along with the influence of trends of the stock market, in which it is listed. Moreover, the investor must consider that the price of the securities or instruments can fluctuate against their interest and cause the partial and even total loss of the invested capital.

The information contained hereby has been obtained from sources that we consider to be reliable, but we make no representation as to its accuracy or completeness. The information, estimations and recommendations included in this document are valid as of the issue date, but are subject to modifications and changes without prior notice; Grupo Financiero Banorte S.A.B. of C.V. does not commit to communicate the changes and also to keep the content of this document updated. Grupo Financiero Banorte S.A.B. of C.V. takes no responsibility for any loss arising from the use of this report or its content. This document may not be photocopied, quoted, disclosed, used, or reproduced in whole or in part without prior written authorization from Grupo Financiero Banorte S.A.B. of C.V.
