

Remittances – New historical high in inflows in October

- Remittances (October): US\$5,811.5 million; Banorte: US\$5,781.2mn; Consensus: US\$5,737.0mn (range: US\$5,529.0mn to US\$5,900.0mn); previous: US\$5,612.6mn
- Inflows increased 8.4% y/y, a moderation relative to September, albeit a new historical high (previous: US\$5,696.9 million in May 2023). As such, accumulated resources in the last twelve months reached US\$63,058.9 million
- The number of operations came in at 14.6 million (+5.2% y/y). The average amount was US\$396.99 (+3.0%)
- Sequentially, flows backtracked 1.9% m/m. However, the base was quite challenging, at +5.2% in September. In our opinion, dynamics remain favorable, with higher household disposable income due to a moderation in inflationary pressures
- Based on their typical seasonal behavior at the end of 2023, we reaffirm our call of flows between US\$63,750 and US\$64,250 million for the full year. The latter would be supported by dynamism in US activity, despite our view of a moderation in the last quarter

October, month with the highest flows so far this year... and in history. The amount sent came in at US\$5,811.5 million, surpassing even our estimate which was higher than consensus at US\$5,737.0 million. Seasonality is favorable, highlighting that in the last two years the tenth month was the highest in the reception of remittances. Previously it was in May, helped by Mother's Day. In addition, labor market conditions –stable to positive– and lower inflation in the US –with declines in gasoline prices and goods in general, as well as a moderation in lodging– could be easing the pressures on household spending and supporting flows to their families in Mexico. Therefore, in the annual comparison they increased by 8.4%, with a slight moderation compared to the 11.3% in September. As a result, the accumulated amount in the last twelve months reached US\$63,058.9 million.

Regarding US economic activity, 3Q23 GDP reaffirmed its strength, with consumption as its main driver. However, timely figures are mixed. Retail sales' control group advanced 0.2% m/m in October. Industrial production in the same month declined by 0.6%, with manufacturing at -0.7%, impacted by a relevant fall in the auto sector. Related to migrant employment, housing starts and building permits were slightly above the previous figure and estimates. Inflation continued to moderate, with energy prices falling. Thus, the annual rate was 3.2%. Finally, employment showed a relatively weak performance, although more stable among migrants (see section below for details).

Acceleration of the average amount. 14.6 million operations were made from 13.9 million in September. Despite of the above, it advanced 5.2% y/y from 8.9% previously. Meanwhile, the average amount sent came in at US\$396.99 (previous: US\$403.47), climbing 3.0% y/y (previous: 2.2%). In our opinion, these results not only reflect a possible improvement in household's disposable income, but also a new seasonal pattern. We believe the latter could be related to some Mexican festivities (e.g. Day of the Dead) or even changes in migration dynamics (both legal and illegal).

Document for distribution among the general public

Sequential contraction, although it does not seem to warrant concerns. With seasonally adjusted figures, remittances fell 1.9% m/m (previous: 5.2%). Despite the slight deterioration in the overall unemployment rate, data for migrants were more stable. In numbers, nonfarm payrolls resulted in +150 thousand jobs, with the unemployment rate rising to 3.9% from 3.8%. For Hispanics and Latinos, the latter increased to 4.8% from 4.6%. Specifically, the rate for Mexican migrants rose to 4.5% from 4.3%. Explaining this, the working age population—including ‘natives’, ‘non-native citizens’, and ‘non-citizens’ (legal or illegal)—fell by 56.7k. However, employed persons expanded by 109.8k, with those unemployed increasing by 40.6k.

Healthy flows in the remainder of the year, but with greater caution towards 2024. Our view on inflows for all 2023 and 2024 remains positive—with this year’s estimate in a range between US\$63,750 billion and US\$64,250 million. However, when analyzing the current balance of risks, we recognize a higher likelihood that some headwinds will begin to become more prominent.

In order of importance, we highlight factors across the US economy: (1) A slowdown in activity as a consequence of restrictive monetary policy, with our GDP estimate at 1.0% q/q saar for 4Q23—with less strength in household spending—and 1.1% for all of 2024; (2) weaker labor demand—with consensus anticipating figures below 60 thousand new jobs per month as early as 1Q24—, accompanied by an unemployment rate above 4.0%; (3) a moderation in the construction of new homes, with current forecasts anticipating a recovery in the trend until the third quarter of next year; and (4) electoral campaigns causing uncertainty on migration laws. Other elements we are keeping an eye on are the inflation path and the Mexican peso, as they could indirectly influence the average monthly amount sent.

In other news, based on the report ‘*Remittances to Latin America and the Caribbean in 2023*’ by the Inter-American Development Bank, the increase in the flow of remittances has been a constant for the region. According to their figures, 60% of remittances received in this region came from the US. Three reasons explain most of this, being: (1) An increase in the Latin American labor force (+3.4% y/y); (2) an expansion in average wages of said population (US\$860 per week, +3.9% y/y); and (3) a rise in migrant population. However, on this last point, Mexico was the only country that showed a marginal decrease of -0.1%, equivalent to 12 thousand fewer migrants.

Analyst Certification.

We, Alejandro Padilla Santana, Juan Carlos Alderete Macal, Alejandro Cervantes Llamas, Manuel Jiménez Zaldívar, Marissa Garza Ostos, Katia Celina Goya Ostos, Francisco José Flores Serrano, José Luis García Casales, Víctor Hugo Cortes Castro, José Itzamna Espitia Hernández, Carlos Hernández García, Leslie Thalia Orozco Vélez, Hugo Armando Gómez Solís, Yazmín Selene Pérez Enríquez, Cintia Gisela Nava Roa, Miguel Alejandro Calvo Domínguez, José De Jesús Ramírez Martínez, Gerardo Daniel Valle Trujillo, Luis Leopoldo López Salinas, Isaías Rodríguez Sobrino, Juan Carlos Mercado Garduño, Paula Lozoya Valadez, Daniel Sebastián Sosa Aguilar, Jazmin Daniela Cautencos Mora and Andrea Muñoz Sánchez, certify that the points of view expressed in this document are a faithful reflection of our personal opinion on the company (s) or firm (s) within this report, along with its affiliates and/or securities issued. Moreover, we also state that we have not received, nor receive, or will receive compensation other than that of Grupo Financiero Banorte S.A.B. of C.V. for the provision of our services.

Relevant statements.

In accordance with current laws and internal procedures manuals, analysts are allowed to hold long or short positions in shares or securities issued by companies that are listed on the Mexican Stock Exchange and may be the subject of this report; nonetheless, equity analysts have to adhere to certain rules that regulate their participation in the market in order to prevent, among other things, the use of private information for their benefit and to avoid conflicts of interest. Analysts shall refrain from investing and holding transactions with securities or derivative instruments directly or through an intermediary person, with Securities subject to research reports, from 30 calendar days prior to the issuance date of the report in question, and up to 10 calendar days after its distribution date.

Compensation of Analysts.

Analysts' compensation is based on activities and services that are aimed at benefiting the investment clients of Casa de Bolsa Banorte and its subsidiaries. Such compensation is determined based on the general profitability of the Brokerage House and the Financial Group and on the individual performance of each analyst. However, investors should note that analysts do not receive direct payment or compensation for any specific transaction in investment banking or in other business areas.

Last-twelve-month activities of the business areas.

Grupo Financiero Banorte S.A.B. de C.V., through its business areas, provides services that include, among others, those corresponding to investment banking and corporate banking, to a large number of companies in Mexico and abroad. It may have provided, is providing or, in the future, will provide a service such as those mentioned to the companies or firms that are the subject of this report. Casa de Bolsa Banorte or its affiliates receive compensation from such corporations in consideration of the aforementioned services.

Over the course of the last twelve months, Grupo Financiero Banorte S.A.B. C.V., has not obtained compensation for services rendered by the investment bank or by any of its other business areas of the following companies or their subsidiaries, some of which could be analyzed within this report.

Activities of the business areas during the next three months.

Casa de Bolsa Banorte, Grupo Financiero Banorte or its subsidiaries expect to receive or intend to obtain revenue from the services provided by investment banking or any other of its business areas, by issuers or their subsidiaries, some of which could be analyzed in this report.

Securities holdings and other disclosures.

As of the end of last quarter, Grupo Financiero Banorte S.A.B. of C.V. has not held investments, directly or indirectly, in securities or derivative financial instruments, whose underlying securities are the subject of recommendations, representing 1% or more of its investment portfolio of outstanding securities or 1 % of the issuance or underlying of the securities issued.

None of the members of the Board of Grupo Financiero Banorte and Casa de Bolsa Banorte, along general managers and executives of an immediately below level, have any charges in the issuers that may be analyzed in this document.

The Analysts of Grupo Financiero Banorte S.A.B. of C.V. do not maintain direct investments or through an intermediary person, in the securities or derivative instruments object of this analysis report.

Guide for investment recommendations.

	Reference
BUY	When the share expected performance is greater than the MEXBOL estimated performance.
HOLD	When the share expected performance is similar to the MEXBOL estimated performance.
SELL	When the share expected performance is lower than the MEXBOL estimated performance.

Even though this document offers a general criterion of investment, we urge readers to seek advice from their own Consultants or Financial Advisors, in order to consider whether any of the values mentioned in this report are in line with their investment goals, risk and financial position.

Determination of Target Prices

For the calculation of estimated target prices for securities, analysts use a combination of methodologies generally accepted among financial analysts, including, but not limited to, multiples analysis, discounted cash flows, sum-of-the-parts or any other method that could be applicable in each specific case according to the current regulation. No guarantee can be given that the target prices calculated for the securities will be achieved by the analysts of Grupo Financiero Banorte S.A.B. C.V, since this depends on a large number of various endogenous and exogenous factors that affect the performance of the issuing company, the environment in which it performs, along with the influence of trends of the stock market, in which it is listed. Moreover, the investor must consider that the price of the securities or instruments can fluctuate against their interest and cause the partial and even total loss of the invested capital.

The information contained hereby has been obtained from sources that we consider to be reliable, but we make no representation as to its accuracy or completeness. The information, estimations and recommendations included in this document are valid as of the issue date, but are subject to modifications and changes without prior notice; Grupo Financiero Banorte S.A.B. of C.V. does not commit to communicate the changes and also to keep the content of this document updated.
