OPEC+: Defer plan to return crude-oil to the market

- Today, OPEC+ decided to extend their additional voluntary production cuts of 2.2 Mbbl/d –set to last until [September](#)– for two months until the end of November
- As such, the schedule of production increases was deferred. Now, these barrels will be gradually reintroduced to the market until December and being completed by the end of 2025, as depicted in the table below. It is worth noting that these adjustments could be paused or reversed depending on market conditions
- It is important to note that the cuts of 2 Mbbl/d established in [October 2022](#), are in force until the [end of 2024](#), while the voluntary cuts of 1.65 Mbbl/d established in [April 2023](#) are in force until to [December 2025](#)
- Within the official communiqué, overproducing countries also stressed their commitment to fully compensate for the overproduced volume by September 2025
- Market reaction was positive with the main crude-oil benchmarks rallying up to 1.5% on the day; however, the momentum quickly faded. The decision was made amid a sharp sell-off in prices driven by concerns on global demand. Brent trades near to 14-month lows at 72.5 \$/bbl (-0.3%), accumulating a loss of 16% so far in 2H24. Meanwhile, WTI fell to its lowest levels of the year at 68.9 \$/bbl (-0.4%), equivalent to a loss of 12% in the second half of 2024
- Under this backdrop, we expect more moderate price dynamics, with Brent oscillating between 65 and 80 \$/bbl for the remainder of the year
- The next OPEC+ Ministerial Meeting will be on December 1st, 2024, maintaining a semi-annual frequency
