Take profits on TIIE IRS 2s10s steepener

- We recommend taking profits on our [trade idea in the 2s10s spread in TIIE-28 IRS](#) (entry: -83bps, target: -35bps, and stop-loss: -100bps) currently trading at -43bps
- At current levels, the strategy has accumulated a capital gain of 30bps, net of the negative carry and roll-down effect of 10bps over the 68 days it has been open
- We continue to expect a steeper yield curve in Mexico going forward, and on September 6th, [we updated the strategy with a "stop-win"](#) level to protect the accumulated gains. However, the market is pricing in a very aggressive rate cut scenario for the Fed in the short-term, suggesting a potential sell-off on nominal rates in the aftermath of tomorrow's FOMC announcement
- The curve incorporates 43bps of implied cuts for tomorrow's decision, while in our view, the Fed will only cut 25bps. The meeting will also provide an update of the Summary of Economic Projections, and along with the dot plot, the market could interpret the message with a less dovish tilt vis-à-vis current expectations
- As such, we suggest capitalizing the gains from this strategy and wait for new relative value opportunities
