# **3Q23 Auction Calendar: Less issuance in inflation-linked bonds (Udibonos)**

- Today, the Ministry of Finance (MoF) published the 3Q23 government securities auction calendar. Changes were moderate, highlighting a reduction in the average amounts offered in most Udibonos and the 10-year Mbono
- During the call, it was noted that these adjustments factor-in the current backdrop, highlighting: (1) The uncertainty of higher interest rates in the US;
   (2) higher pressures in US Treasuries, which spill over to local rates; (3) the end of the restrictive cycle in Latam; as well as (4) favorable inflation prints and better expectations for Mexico's GDP growth
- Furthermore, the reduction in Udibonos's supply considered low demand during 2Q23 in a backdrop of positive inflation surprises. For example, the bid-to-cover of the 10-year benchmark averaged 1.6x in the quarter, below the 2.0x for the same term in the nominal yield curve. This, despite a lower average auction amount in Udibonos (UDIS 1.5 billion, or about MXN 11.65 billion) than in the Mbono (MXN 16 billion)
- During the quarter, the Mbonos' curve inverted further due to gains in the mid- and long-end of 25bps. Meanwhile, Udibonos have lost 6bps on average. In terms of strategy, we reiterate our preference for nominal vs. real rates, as we foresee inflation still moderating. In addition, we expect <a href="Banxico">Banxico</a> to keep the benchmark rate at 11.25% for the rest of the year. In this context, real interest rates will remain attractive both in absolute and relative terms considering that swaps are pricing-in the start of a more aggressive easing cycle in other Latam countries, such as Brazil and Chile

## Government securities

- Cetes: Issuance ranges remained unchanged compared with the previous quarter, with a minimum of MXN 5 billion and maximum at MXN 20 billion. In addition, 28-, 91-, and 182-day nodes will be auctioned weekly, while 364- and 728-day tenors will be held every two weeks
- Mbonos: The average amount decreased for the 10-year benchmark to MXN 14.5 billion (-1.5 billion), while the 3- and 30-year securities were raised to MXN 13.5 billion (+0.5 billion) and MXN 9.5 billion (+0.3 billion), in the same order. The 5- and 20- year tenors remained unchanged at MXN 13 billion and MXN 4.5 billion, respectively
- Udibonos: Average amounts decreased for all tenors, excluding the 20-year security which remained at UDIS 600 million. The 3-, 10-, and 30-year benchmarks moved to UDIS 700 million (-200 million), UDIS 1.3 billion (-200 million), and UDIS 900 million (-100 million), respectively

- O Bondes F: Amounts remained unchanged in most tenors, as follows: 1-year to MXN 5.5 billion (unchanged), 2-years to MXN 5.0 billion (+0.5 billion), 3-years to MXN 1.5 billion (unchanged), 5-years to MXN 1 billion (unchanged), 7-years to MXN 800 million (unchanged), and 10-years to MXN 750 million (unchanged). As in the previous quarter, each node will be auctioned on a bi-weekly basis, except for the 7- and 10-year tenors (monthly)
- The MoF stated that it may use tools at its disposal to preserve proper market functioning, smooth the maturity profile, improve the portfolio's efficiency, and strengthen liquidity in specific securities. In addition, special operations will be carried out in the period, if market conditions are favorable
- o Finally, the MoF highlighted its commitment to preserve economic stability and of the local debt market, as well as to follow closely the evolution of financial markets and inform in a timely manner syndicated auctions, issuance of Bondes G, and/or any change in the government securities auction program

# Banxico operations

- As in 2Q23, Banxico will issue Bondes F on a weekly basis for monetary regulation purposes for up to MXN 3 billion, distributed equally between 1-, 3-, and 5-year Bondes F; that is, MXN 1 billion at each maturity
- Again, the central bank will carry out extraordinary transactions to sterilize the expected liquidity expansion in the financial system during 3Q23. Therefore, Banxico may call extraordinary auctions of Cetes and/or Bondes F. Finally, debt exchange auctions could be executed to smooth the impact on liquidity due to the maturity profile. These transactions will be held for a total amount of up to MXN 80 billion
- It is worth mentioning that these operations are neutral from the standpoint of Banxico's monetary policy stance and do not impact the Overnight Interbank Interest Rate

## **IPAB Bonds**

- o Total weekly amounts stayed at MXN 4.9 billion, as follows:
  - 3-year (BPAG28): MXN 1.7 billion
  - 5-year (BPAG91): MXN 1.7 billion
  - 7-year (BPAG182): MXN 1.5 billion

## Pemex Bonds

 For 2023, Petróleos Mexicanos's financing program allows net internal indebtedness of up to MXN 27.07 billion and will remain flexible to adapt to the company's needs and prevailing financial market conditions

- For the third quarter, Pemex will evaluate carrying out new issuances, reopening outstanding bonds, or execute liability management transactions to improve the company's liquidity and the price discovery process. Pemex will be sensitive to market volatility and investor appetite
- o In addition to issuances in debt markets, the financing strategy will contemplate credit lines, both syndicated and bilateral, revolving credit facilities, as well as structured financing alternatives. The company may refinance this type of financing sources during the year to strengthen Pemex's financial position
- If any issuances in the local market were to take place, they will be carried out through the communicating vessels mechanism in different formats, such as variable rate, nominal fixed rate, and real fixed rate. The corresponding amounts and dates will be disclosed through proper public offering announcements

Even though this document offers a general criterion of investment, we urge readers to seek advice from their own Consultants or Financial Advisors, in order to consider whether any of the values mentioned in this report are in line with their investment goals, risk and financial position.

### Determination of Target Prices

For the calculation of estimated target prices for securities, analysts use a combination of methodologies generally accepted among financial analysts, including, but not limited to, multiples analysis, discounted cash flows, sum-of-the-parts or any other method that could be applicable in each specific case according to the current regulation. No guarantee can be given that the target prices calculated for the securities will be achieved by the analysts of Grupo Financiero Banorte S.A.B. C.V, since this depends on a large number of various endogenous and exogenous factors that affect the performance of the issuing company, the environment in which it performs, along with the influence of trends of the stock market, in which it is listed. Moreover, the investor must consider that the price of the securities or instruments can fluctuate against their interest and cause the partial and even total loss of the invested capital.
