

OPEC+: Collective output cut by 1 Mbbl/d, while Saudi Arabia extended its supply restriction

- OPEC+ agreed to an additional supply curb of 1 million barrels per day (Mbbl/d) of crude-oil –which will be announced separately by each member– to go alongside Saudi Arabia's much-anticipated extension of its voluntary output cut of the same size until 1Q24. This happens after delaying the Ministerial Meeting by four days due to internal disagreements over some members' production quotas
- As a result, the organization will keep [crude-oil output cuts of about 5 million barrels per day \(Mbbl/d\) by the end of this year](#), but these will increase to almost 6 Mbbl/d at the beginning of 2024, including further cuts to Russian exports of 500 thousand barrels per day (Kbbl/d)
- In addition, Brazil has been invited to join the crude-oil alliance next year, although they wouldn't take part in the planned cuts. Brazilian officials will analyze their cooperation charter to evaluate the benefits, according with government protocol
- The initial market reaction was slightly positive because an expectation of greater cuts had already been incorporated, accumulating an advance of 5.3% in the last three sessions. However, the statement was characterized by a lack of clarity as official cuts were not mentioned. Hence, crude-oil prices returned to session lows, with WTI and Brent trading at 75.8 \$/bbl (-2.6%) and 82.8 \$/bbl (-0.3%), diluting the earlier momentum of +1.8% and +1.5%, in the same order
- The decision was made in a context in which crude-oil prices have showed a negative trend, falling around 20% from their highest point in September. This led Brent to trade below 80 \$/bbl and, [as we anticipated](#), triggered a deeper reduction by OPEC+. The drop in prices was a consequence of a weakening outlook for global demand due to disappointing economic activity in China, concerns about the economy ahead in a scenario of high rates for longer, and a strengthening of the dollar due to uncertainty about the next moves from the Fed. On top of this, US inventories have been growing, up 8.6% since the beginning of October
- We consider that OPEC+ will continue working to avoid an oil surplus next year, which is a key driver behind our view of a strong support at 80 \$/bbl. However, we limit the upper range to 95 \$/bbl for 1Q24 given seasonally weak demand at the beginning of the year ([previous 1Q24: 80-100 \\$/bbl](#))
- The next OPEC+'s Ministerial Meeting will be held on June 1st in Vienna, while the Joint Ministerial Monitoring Committee will be held in late January

Guide for investment recommendations.

	Reference
BUY	When the share expected performance is greater than the MEXBOL estimated performance.
HOLD	When the share expected performance is similar to the MEXBOL estimated performance.
SELL	When the share expected performance is lower than the MEXBOL estimated performance.

Even though this document offers a general criterion of investment, we urge readers to seek advice from their own Consultants or Financial Advisors, in order to consider whether any of the values mentioned in this report are in line with their investment goals, risk and financial position.

Determination of Target Prices

For the calculation of estimated target prices for securities, analysts use a combination of methodologies generally accepted among financial analysts, including, but not limited to, multiples analysis, discounted cash flows, sum-of-the-parts or any other method that could be applicable in each specific case according to the current regulation. No guarantee can be given that the target prices calculated for the securities will be achieved by the analysts of Grupo Financiero Banorte S.A.B. C.V, since this depends on a large number of various endogenous and exogenous factors that affect the performance of the issuing company, the environment in which it performs, along with the influence of trends of the stock market, in which it is listed. Moreover, the investor must consider that the price of the securities or instruments can fluctuate against their interest and cause the partial and even total loss of the invested capital.
