

Industrial production – Small rebound in November suggests a slowdown in 4Q24

- **Industrial production (November): -1.4% y/y nsa; Banorte: -0.9%; consensus: -1.4% (range: -1.8% to -0.5%); previous: -2.1%**
- **Industrial activity rebounded 0.1% m/m, quite modest after the 1.1% contraction in October. We believe this confirms a slowdown trend in 4Q24, reflecting some weakness on both the external and domestic fronts**
- **By sectors, manufacturing grew 0.7% m/m, with 14 of its 21 categories higher –with the 3.8% expansion in transportation standing out. Mining was lower at 0.4%, driven by 'related services', although with the oil component again down. Finally, construction came in at -1.8%, with declines in both edification and civil engineering**
- **We believe that industrial production could remain sluggish at the start of 2025. Some challenges will extend at least to the first quarter, exacerbated by an environment of greater external uncertainty. However, other drivers could gain momentum as the year progresses**

Industrial activity adds four months in contraction in annual terms. Production fell 1.4% y/y (see [Chart 1](#)), in line with consensus (-1.4%) but lower than our estimate (-0.9%). Manufacturing turned negative at -0.2% ([Chart 2](#)), despite a more favorable base effect. Meanwhile, mining continued its negative streak at -4.7%, accumulating 17 months of declines. Construction also contracted at -4.2%. Regarding calendar effects, the period had one less working day than in 2023. Thus, with seasonally adjusted figures, the result was marginally better at -0.9% y/y. For more details, see [Table 1](#).

Modest monthly advance. Activity grew 0.1% m/m, rather small considering the 1.1% loss seen in October ([Chart 3](#)). While results were mostly positive, this was largely driven by favorable base effects. The overall outlook continued exhibiting signs of fragility. On the external side, manufacturing demand did not change substantially, extending the sluggishness of US industry. Construction metrics were better at the margin, with government spending and sentiment indicators positive, albeit with employment mixed (IMSS losses and ENOE gains).

By sectors, manufacturing grew 0.7%, failing to recover the previous month's loss (-1.8%). This contrasts with the US, where this sector fell 0.5%, while our country's manufacturing exports fell again, albeit modestly (-0.2%). In detail, 14 of the 21 categories increased. The most relevant were 'others' (+12.4%), furniture (+5.6%), and transportation (+3.8%) –consistent with what was reported by AMIA. Losses concentrated in oil and carbon (-8.2%), basic metals (-4.0%), and electrical equipment (-1.7%).

Mining grew 0.4%. The oil component came in at -2.4% –highlighting contractions in ten of the eleven months so far this year– which was anticipated on reports of lower oil and gas production. The non-oil item stood at -1.6%, consistent with the drop in non-oil mining exports within the trade balance. Finally, 'related services' increased 41.4% after two months of sharp declines.

Construction fell 1.8% ([Table 2](#)), with a weak performance. Civil engineering contracted 3.1%, down for a fifth consecutive month and contrasting with the acceleration in government spending on physical investment in the period. Edification backtracked 2.0%, continuing its streak of volatility since the middle of the year. Finally, specialized works rose 3.5% after three months down.

Document for distribution among the general public

Industrial production will have a weak start of the year, although it will likely gain momentum as it progresses. The beginning of 2025 will maintain some of the headwinds seen at the end of 2024, highlighting the weakness of external demand. In addition, uncertainty will be greater given: (1) The expectation that Donald Trump could start implementing punitive measures on trade and immigration; and (2) the rules, definitions, and timetable for government infrastructure projects this year.

Delving into those points, different industry sectors are keeping an eye on Trump's first executive orders. His tone during the campaign and the different statements as President-elect on tariffs remains a relevant focus, specifically given the effects they could have on manufacturing. In this regard, earlier this week he reiterated his vision of imposing broad taxes on imports, ruling out the possibility that these measures will be limited to critical or key goods. Regarding the second, the *Report on the First 100 days* of the six-year term –to be released on January 12th– will be relevant, as well as analyzing the content of the *Plan Mexico* –to be presented on January 13th by the executive branch. Regarding the first, details will be unveiled about the \$800 billion already earmarked in the [2025 Spending Budget](#) for priority projects (remembering that the government will focus on railroads). Meanwhile, the *Plan Mexico*, seeks to boost private investment “...that generates wellbeing and that they settle those places that promote development...”, in the words of President Claudia Sheinbaum. It will also complement the National Development Plan. We believe that it will be important to review whether it considers public-private partnerships, a figure that she mentioned as viable in the government project for EVs.

On foreign trade, the federal government has taken some fiscal measures that could positively impact certain manufactured goods. As of January 1st, all products imported using digital platforms from countries that do not have a trade agreement (e.g. *Aliexpress, Shein, Temu*) will be subject to a 19% tax (which contemplates usual VAT of 16% plus a 3% import tax). This measure is in addition to the 15% tax on intermediate textile products and 35% on those already manufactured announced in December. According to the Economy Minister, Marcelo Ebrard, these new taxes on imports are “...to protect our national industry; and we close this door which they are abusing...”; adding that “...the national textile industry needs a competitive and fair environment to maintain its relevance in the market and continue generating jobs...”. The *National Chamber of the Textile Industry* has calculated that this decree will result in the recovery of almost 70 thousand jobs. Going forward, we do not rule out similar measures in a context of world trade reconfiguration and the current administration's closer alignment of reducing the trade deficit with China.

Finally, we anticipate that government spending on flagship projects will move more decisively in the second half of the year. Also, lower uncertainty and a more advanced accommodative cycle from Banxico will help industry gain some momentum. While performance by sector is likely to remain mixed, we see potential for both construction and manufacturing.

Analyst Certification.

We, Alejandro Padilla Santana, Juan Carlos Alderete Macal, Alejandro Cervantes Llamas, Marissa Garza Ostos, Katia Celina Goya Ostos, Francisco José Flores Serrano, José Luis García Casales, Santiago Leal Singer, Víctor Hugo Cortes Castro, Leslie Thalía Orozco Vélez, Hugo Armando Gómez Solís, Carlos Hernández García, Yazmín Selene Pérez Enríquez, Cintia Gisela Nava Roa, José De Jesús Ramírez Martínez, Daniel Sebastián Sosa Aguilar, Gerardo Daniel Valle Trujillo, Luis Leopoldo López Salinas, Marcos Saúl García Hernandez, Juan Carlos Mercado Garduño, Ana Gabriela Martínez Mosqueda, Ana Laura Zaragoza Félix, Jazmin Daniela Cuautencos Mora, Andrea Muñoz Sánchez and Paula Lozoya Valadez, certify that the points of view expressed in this document are a faithful reflection of our personal opinion on the company (s) or firm (s) within this report, along with its affiliates and/or securities issued. Moreover, we also state that we have not received, nor receive, or will receive compensation other than that of Grupo Financiero Banorte S.A.B. of C.V for the provision of our services.

Relevant statements.

In accordance with current laws and internal procedures manuals, analysts are allowed to hold long or short positions in shares or securities issued by companies that are listed on the Mexican Stock Exchange and may be the subject of this report; nonetheless, equity analysts have to adhere to certain rules that regulate their participation in the market in order to prevent, among other things, the use of private information for their benefit and to avoid conflicts of interest. Analysts shall refrain from investing and holding transactions with securities or derivative instruments directly or through an intermediary person, with Securities subject to research reports, from 30 calendar days prior to the issuance date of the report in question, and up to 10 calendar days after its distribution date.

Compensation of Analysts.

Analysts' compensation is based on activities and services that are aimed at benefiting the investment clients of Casa de Bolsa Banorte and its subsidiaries. Such compensation is determined based on the general profitability of the Brokerage House and the Financial Group and on the individual performance of each analyst. However, investors should note that analysts do not receive direct payment or compensation for any specific transaction in investment banking or in other business areas.

Last-twelve-month activities of the business areas.

Grupo Financiero Banorte S.A.B. de C.V., through its business areas, provides services that include, among others, those corresponding to investment banking and corporate banking, to a large number of companies in Mexico and abroad. It may have provided, is providing or, in the future, will provide a service such as those mentioned to the companies or firms that are the subject of this report. Casa de Bolsa Banorte or its affiliates receive compensation from such corporations in consideration of the aforementioned services.

Over the course of the last twelve months, Grupo Financiero Banorte S.A.B. C.V., has not obtained compensation for services rendered by the investment bank or by any of its other business areas of the following companies or their subsidiaries, some of which could be analyzed within this report.

Activities of the business areas during the next three months.

Casa de Bolsa Banorte, Grupo Financiero Banorte or its subsidiaries expect to receive or intend to obtain revenue from the services provided by investment banking or any other of its business areas, by issuers or their subsidiaries, some of which could be analyzed in this report.

Securities holdings and other disclosures.

As of the end of last quarter, Grupo Financiero Banorte S.A.B. of C.V. has not held investments, directly or indirectly, in securities or derivative financial instruments, whose underlying securities are the subject of recommendations, representing 1% or more of its investment portfolio of outstanding securities or 1 % of the issuance or underlying of the securities issued.

None of the members of the Board of Grupo Financiero Banorte and Casa de Bolsa Banorte, along general managers and executives of an immediately below level, have any charges in the issuers that may be analyzed in this document.

The Analysts of Grupo Financiero Banorte S.A.B. of C.V. do not maintain direct investments or through an intermediary person, in the securities or derivative instruments object of this analysis report.

Guide for investment recommendations.

	Reference
BUY	When the share expected performance is greater than the MEXBOL estimated performance.
HOLD	When the share expected performance is similar to the MEXBOL estimated performance.
SELL	When the share expected performance is lower than the MEXBOL estimated performance.

Even though this document offers a general criterion of investment, we urge readers to seek advice from their own Consultants or Financial Advisors, in order to consider whether any of the values mentioned in this report are in line with their investment goals, risk and financial position.

Determination of Target Prices

For the calculation of estimated target prices for securities, analysts use a combination of methodologies generally accepted among financial analysts, including, but not limited to, multiples analysis, discounted cash flows, sum-of-the-parts or any other method that could be applicable in each specific case according to the current regulation. No guarantee can be given that the target prices calculated for the securities will be achieved by the analysts of Grupo Financiero Banorte S.A.B. C.V, since this depends on a large number of various endogenous and exogenous factors that affect the performance of the issuing company, the environment in which it performs, along with the influence of trends of the stock market, in which it is listed. Moreover, the investor must consider that the price of the securities or instruments can fluctuate against their interest and cause the partial and even total loss of the invested capital.

The information contained hereby has been obtained from sources that we consider to be reliable, but we make no representation as to its accuracy or completeness. The information, estimations and recommendations included in this document are valid as of the issue date, but are subject to modifications and changes without prior notice; Grupo Financiero Banorte S.A.B. of C.V. does not commit to communicate the changes and also to keep the content of this document updated. Grupo Financiero Banorte S.A.B. of C.V. takes no responsibility for any loss arising from the use of this report or its content. This document may not be photocopied, quoted, disclosed, used, or reproduced in whole or in part without prior written authorization from Grupo Financiero Banorte S.A.B. of C.V.
